Radiation City Mod Apk is a game where you have to explore the city and survive in it. This game is an action-adventure game. When you start playing this game, you will be introduced to a storyline that will follow throughout the game. You will get to know about the story of the radiation city when you play the game. Alternate Games alpha guns mod apk Kill Shot Bravo Mod APK Gta iv android Mod apkThe main character in this storyline is called "radiation". He is a scientist who has been working on some experiments with nuclear weapons. radiation city is one of the most popular games that has been released recently on the android platform by developers at Glu Games inc. Radiation City Mod Apk is a survival game developed by the creator of the famous "Last Day on Earth" game. You are in a world which is infected by a horrible virus that can turn people into zombies. Your goal is to survive and find out the truth behind this chaos. You will start your journey with an empty backpack, and you need to collect resources and make equipment for yourself, so you can protect yourself from zombies. Along the way, you'll discover many areas and meet other survivors who will join your team. But remember that not all of them are friendly. Radiation City Mod Apk is an interesting game with a mixture of horror and role-playing which offers you to explore the city of Chernobyl after the disaster. You play as a character who was on the way to Chernobyl for a business trip when everything happened. And now you need to find your family in such terrible conditions. The game has very good graphics and the gameplay is also very well worked out. Radiation City is an adventure game where you play as a survivor of a nuclear disaster in a city that has been invaded by zombies and other monsters. You have to explore the city in search of supplies that you can use to survive, but it's not going to be easy. Radiation City Mod is an open world, first-person survival game. The player must move through the city and its outskirts to find his wife and daughter. The player will encounter a variety of enemies, both human and mutant creatures. There are over 100 types of weapons and items in the game, which can be found or traded with other survivors the player encounters during their journey. The player's actions will determine the ending of the game, with one ending being that they find their family safe and unharmed, another ending where their family has been killed, and one with a more ambiguous outcome. Radiation City has received mostly positive reviews from critics; it currently holds an aggregate score of 79 out of 100 on Metacritic based on 27 reviews. Complete Missions: 150+ story-driven quests will provide you with hours of thrilling gameplay. Use your wits to solve them all! Explore Radiation City: Discover the open world of a deserted city and its surroundings that were left by its residents after a mysterious catastrophe. Delve into abandoned buildings and underground tunnels. Venture into radiation zones where your gear will be severely tested. Survive At All Costs: Keep an eye on your character's health, hunger, thirst, radiation exposure, stamina and injuries. If any of these stats reaches zero - you are dead! Search for food, water and medical supplies to stay alive! Choose Your Path: The game features multiple endings depending on how you play and what decisions you make during critical moments of the story. So choose your path carefully! Craft Useful Items: Combine items from your inventory to craft new things such as weapons, first aid kits or even body armor. Use them wisely or lose! Radiation City Mod is a zombie game. It is a survival game. You have to survive in this game and save your family members. This game is full of adventures and horror. The whole world is destroyed in the radiation city. You have to survive in this city alone. App market for 100% working mods. Accelerated for downloading big mod files. What is HappyMod? How does it work? The more skill points you use, the more skill points you use4.100 times experience gain5. Will not be hungry6. Will not be thirsty7. Unlimited HPMod with Chinese Menu (Collected on the internet) If you were taken to a radioactive area filled with strange creatures, along with people who were abnormally altered by radiation, could you survive there? These creatures will always try to attack you, even eat you if you do not focus on keeping your life. Perhaps this topic you have seen in many famous survival games, but, I think you will have to admit to me that this content has never been boring. On the contrary, any game on this topic brings us excitement and dramatic moments when experiencing it. If you still can't forget the familiar battle scenes with mutant creatures, the game I'm about to introduce to you is a perfect fit, and it's called Radiation City. Developed by Atypical Games, Radiation City is one of the games with content and graphics that I appreciate the most on the phone platform. Despite its familiar gameplay and content, I am sure it will still stimulate your instinct for survival. Plot Like most survival adventure games, Radiation City will also give you a specific storyline and context, where every disaster begins. The plot of the game's developer brought quite specific, the context that the game brought us to is Radiation City 40 years after a sudden accident at the Chernobyl nuclear power plant. This incident has turned the entire city area near the factory contaminated with radiation, and this has caused a lot of harmful effects on the surrounding environment and ecosystem. Humans who are exposed to this environment without protective gear will undoubtedly be exposed to radiation and transformed into an anomaly that attacks all species near them. After 40 years, the amount of radiation in this place has decreased significantly, and your task is to explore this area, decipher the mysteries, and try to save the lives of your loved ones. Gameplay Although the environment in this city is no longer too dangerous for humans, but the consequences of this disaster still make this place a hell for anyone who enters. And sadly, you are the one who must discover and survive in this place. In the game, you will encounter many creatures who transformed, try to find and attack you as soon as possible. Not only that, in certain places, the remaining radiation still causes some strange phenomena and makes the area become more scary and deadly. The whole scene of the game will surely overwhelm you because of the large space, just as you have to be always on high alert because your life can still be taken away at any time. Overall, this game will scare anyone who has not experienced the harsh survival games. So, before downloading this game to your phone, I think you should be prepared to receive what is about to happen in this game. Like most survival games, you'll also have to pick up essential items through the exploration process, and you'll also upgrade existing items to become more useful to you. In addition, you also need to find the ideal shelter to be able to survive the night in this scary area, because the nightlife in this place is much more "bustling". So are you interested in Radiation City? Download it to your phone now to experience it. Category: Get it on Requirements: No requirement The Chernobyl incident can be said to be a disaster that can never be forgotten in the history of human civilization. On the one hand, it has caused almost permanent damage to the environment and has still not been suitable for mankind to live in that place. Plants also mutate because of the effects of radiation. On the other hand, they also remind people that nuclear energy is not completely safe anymore. For many game developers, Chernobyl has become a popular background for many game productions. Many game productions like to take their or similar places as the background of the game. Atypical Games, a developer who launched the game "Radiation Island," launched another new production called Radiation City. Similar to its predecessor, players need to be alone in a region already contaminated by radiation and survive in this area. The game still continues the "Radiation Island" in excellent picture design, and has further improved, the details of the more refined, and from the game's name is not difficult to see that the game in the content and the scene made earlier Larger expansions, larger and larger scenes mean more elements that players can experience while increasing the number and type of enemies they face. The sound design of the game is quite in place, especially the rendering of loneliness, the game is still done in place. The game in order to easily get started or take some time to adapt to the dots on both sides of the screen is responsible for the attack, and drag the fingers on both sides of the screen can control the movement of the character and perspective, respectively, which in the same Type of game has been considered more common, and in the lower right corner were arranged squat, run and jump three buttons, the player can directly click the button to switch, but it is worth mentioning that if the long run, The character will gradually start to wear out and then slow down. Therefore, it is not possible to run with infinite strength. In addition, the backpack and main menu buttons are also located in the upper left and right corner. However, if the player does not feel fit, you can customize the settings in the UI, it is still very convenient. Just enter the game, the player still belongs to nothing, then the player needs to solve the most basic food and clothing problems, if you see the player on the ground there canned meat or water bottles, then do not miss, and if you can find the backpack, Then players will be able to collect more supplies. Also in this place players will not be too "lonely" due to the impact of radiation in this place will appear a variety of sub-human or hungry carnivores, so a handy weapon is essential, and when the night falls Later, if you do not have weapons and lighting in your hands, or suggest that players find a safe place to take a tent to sleep, at least do not have to worry about being attacked during sleep. The contents of the game is still very rich, in addition to weapons, food, supplies, all kinds of tools are everything that can be used to open the can opener, used to open the locked door, etc., without these tools Can not, and most of the tool items are durable set. The game room players can enter them, and sometimes the room can also search out a lot of good things. Overall, the quality of the game is still quite good.
